

Cassandra Kickstart

Designed for organisations who are investigating adopting Apache Cassandra® or are about to start with their first implementation, the Instacluster **Cassandra Kickstart Package** provides an efficient, streamlined approach for evaluating whether Cassandra is the right technology for your concept and intended application

It provides you with the information you need to get started on the right path as well as access to our experts to help you keep on that path. In the Cassandra Kickstart Package you will get hands-on insight into the value of the technology stack and its usage in the application development.

Inclusions

- **Free cluster:** Access to Instacluster development cluster (t2.medium size development 3 node cluster) for a period of 3 months to help you kick-start your hands-on work.
- **Discovery session:** One hour discovery session of your environment and objectives.
- **Introductory knowledge transfer:** A 3 hours introductory training session on core Apache Cassandra® concepts, including specific subjects relevant to your environment and objectives. This session will be conducted by video conference and will allow time for discussions of your particular use case and issues.
- **Follow up Q&A session:** Up to 5 hours of follow-up Q&A sessions with our expert consultant to help you design and build your application and data model. You can choose from two options:
 - up to five, 1 hour video sessions with our consultant for follow-up and review, or
 - a smaller number of longer sessions (totalling 5 hours).
- **General email guidance:** Instacluster's expert consultant will also be available via-email throughout the 3 months period. Where appropriate, Instacluster's consultant may choose to answer an email query by convening a face to face session.

* We target a maximum of 3 working days from receiving request to scheduling sessions.

Key Outcomes

- ✓ Be able to understand the core concepts required to design and build applications to make optimal use of Apache Cassandra®.
- ✓ Be confident in developing an application that uses Cassandra to provide the highest levels of reliability and scale, as your needs evolve.
- ✓ Be able to explore the value of Cassandra on a very specific use case relevant to your business.
- ✓ Get a complete understanding of the value that Instaclustr could add through its Managed Services.
