

Architecture and Design

At Instaclustr, we live and breathe distributed application technologies such as Apache Cassandra®, Apache Spark™, and Apache Kafka®. With years of experience running applications at scale, Instaclustr is the most trusted option when it comes open source. We are a team of highly skilled and friendly open source experts.

So, when you are kicking off a new project and want to determine when, where, and how to use these cutting edge open source technologies to meet your business needs, Instaclustr can help ensure you make the right choices for success.

In the Architecture and Design package, Instaclustr's experts can work with you to:

- Identify key decisions points and requirements to help determine if these technologies can meet your needs.
- Design and implement proof of concept projects to explore and validate these decision points.
- Advise on proven integration and design patterns that meet your requirements.

Key Outcomes

- ✓ You will exit the high-level design phase of your project with greatly improved confidence that you have made the right choices to set your project up for success, and have identified the work that needs to be done to deliver your targeted business outcomes.

Cost
